The MALLING DATE of this communication appears on the cover sheet with the correspondence address → Period for Repty  A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  Extensions of the may be available under the provision of 37 CFR 113(6). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  Extensions of the may be available under the provision of 37 CFR 113(6). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  If NO provide or reply is spondied used both, the maximum studious period will be addressly minimum the mailing date of this communication.  Failure to reply within the set or extended period for reply will, by abstude, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the diffuse that here more mailing date of this communication, even if timely filed, may reduce say.  **Status**  1) Responsive to communication(s) filed on			Examiner	Art Unit			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Each state of the Period of the provisions of 37 CFR 1.35(a), in no event, however, may a reply be timely filed and the period of the provisions of 37 CFR 1.35(a), in no event, however, may a reply be timely filed and the period of the provisions of 37 CFR 1.35(a), in no event, however, may a reply be timely filed and the period of the statutory minimum of thiny (30) days will be considered timely.  If NO period for reply is specified abover, he maintening stated of the statutory minimum of thiny (30) days will be considered timely.  If NO period for reply is specified abover, he maintening stated of the carminimum of thiny (30) days will be considered timely and the period of the carminimum of the period of the period of the period of the carminimum of the period of the carminimum of the period of				l l			
THE MAILING DATE OF THIS COMMUNICATION.  Extensions of airm may be available under the provisions of 37 CPR 1.13(a). In no event, however, may a reply be timely filled after SIX (6) MONTHS from the mailing date of this communication.  If the period in reply specified door is less than thirty (50) days, a right of the studenty minimum of thirty (30) days will be considered drinely.  Failure to reply within the set or extended period for reply will by studies, cause the application to become ABANDONED (38 U.S.C. § 133). Any reply recorded by the Office later han three mornins after the mailing date of this communication, even if timely filled, may reduce any assumed patent term adjustment. See 37 CPR 1.76(b).  Status  1) Responsive to communication(s) filled on by the section is non-final.  3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Experte Quayle, 1935 C.D. 11, 453 O.G. 213.  Disposition of Claims  4) Claim(s) 19.17.18 and 21-27 is/are pending in the application.  4a) Of the above claim(s) is/are allowed.  6) Claim(s) 19.17.18 and 21-27 is/are rejected.  7) Claim(s) is/are allowed.  6) Claim(s) 19.17.18 and 21-27 is/are rejected.  7) Claim(s) is/are subject to restriction and/or election requirement.  Application Papers  9) The specification is objected to by the Examiner.  10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.  Applicant may not request that any objection to the drawing(s) be held in aboyance. See 37 CFR 1.85(a). Reptacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.  Priority under 35 U.S.C. § 119 and 120  12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  3) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 1		TE of this communication app	pears on the cover sheet with the c	orrespondence address			
2a)  This action is FINAL. 2b)  This action is non-final.  3)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.  Disposition of Claims  4)  Claim(s) 1-9.17.18 and 21-27 is/are pending in the application.  4a) Of the above claim(s)  is/are pending in the application.  4a) Of the above claim(s)  is/are allowed.  6)  Claim(s) 1-9.17.18 and 21-27 is/are rejected.  7)  Claim(s)  is/are allowed.  8)  Claim(s) 1-9.17.18 and 21-27 is/are rejected.  7)  Claim(s)  is/are objected to.  8)  Claim(s)  are subject to restriction and/or election requirement.  Application Papers  9)  The specification is objected to by the Examiner.  10)  The drawing(s) filed on  is/are: a) accepted or b) objected to by the Examiner.  Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11)  The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.  Priority under 35 U.S.C. §§ 119 and 120  12  Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  a) All b) Some on None of:  1.  Certified copies of the priority documents have been received.  2.  Certified copies of the priority documents have been received in Application No.  3.  Copies of the certified copies of the priority documents have been received in Application No.  3.  Copies of the certified copies of the priority documents have been received in Application Papers application from the International Bureau (PCT Rule 17.2(a)).  3.  Copies of the certified copies of the priority documents have been received in Application Papers application Data Sheet.  3. ### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election without traverse of claims 1-9, 17-18, and 21-27 in Paper No. 4 is acknowledged.

## Claim Rejections - 35 USC 102

- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
  - A person shall be entitled to a patent unless --
  - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-9, 17-18, and 21-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Hooper et al. (U.S. Patent No. 5,442,390).

Regarding claim 1, Hooper discloses "a method for providing configurable access to media in a media-on-demand system comprising the steps of: delivering the media to a first client device through a first communications link; recording a bookmark specifying a position in the media; and delivering the media to a second client device through a second communications link, said delivery to said second client device beginning at said position specified by said recorded bookmark", i.e., as illustrated in Figure 1, via a communication network 30, users at different locations CPE 10 can access to video-on-demand server system 20 at their convenience locations by using a remote controller 13 or a telephone (a closer look at Figure 12, and col. 1/lines 21-29), wherein the viewing device 12 can be a monitor, a television or a computer work station (col. 3/lines 31-58), and the viewer can pause a requested program or service, and then resuming at any location by accessing to the system with their ID for identifying (Fig. 4, step 420)

Art Unit: 2611

and col. 8/lines 4-12) and the system has a cache index regarding as a bookmark with cache memory for recording the viewer's location of previously viewed programs, and resuming to the point where the user hasn't finished viewing the program, see col. 15/line 48 to col. 16/line 6).

As for claim 2, in view of claim 1 above, Hooper further discloses "further comprising the steps of identifying device properties for each of said first and second client devices; and, delivering the media to said first and second client devices through said respectively established first and second communications links, the media delivered in a format compatible with said identified device properties", i.e., a configuration process including customer's information and the configuration of their device is performed for identifying a particular viewer and their associated device at their location CPE 10 on how to communicate to them (Fig. 4/step 420, and col. 8/lines 4-22).

As for claim 3, in view of claim 2 above, Hooper further discloses "wherein the media is stored in a media-on-demand server (MODS) and delivered to said first and said second client devices via said first and said second communications link respectively", i.e., media is stored on media-on-demand server or VOS system 20 and delivered to the CPE 10 at different locations via corresponding links (Fig. 1 with arrows for links, i.e.,, twisted pair of wires, coaxial cables, fiber optic cables, micro-wave or satellite links, col. 3/lines 1-25)

As for claim 4, in view of claim 3 above, Hooper further discloses "wherein said step of delivering the media to said first client device via said first communications link, comprises receiving the media from said MODS in an intermediate server; in said intermediate server, converting the media to a format compatible with said identified device properties of said first client device; and delivering said converted media to said first client device via said first

Art Unit: 2611

communications link", i.e., the media is delivered via a first communications link to a first client device via an intermediate server as an interface box converter 11, this server converts the receiving media to a compatible format to the client device, for instance, HDTV to a television (Fig. 12, and col. 14/lines 4-54).

As for claim 5, in view of claim 3 above, Hooper discloses "wherein said step of delivering the media to a second client device via said second communications link, comprises: receiving the media in an intermediate server from said MODS; in said intermediate server, converting the media to a format compatible with said identified device properties of said second client device; and delivering said converted media to said second client device via said second communications link", i.e., the media is delivered via a second communications link to a second client device via an intermediate server as an interface box converter 11, this server converts the receiving media to a compatible format to the client device, for instance, signals to a monitor of a personal computer PC (Fig. 12, and col. 14/lines 4-54).

As for claim 6, in view of claim 3 above, Hooper discloses further "comprising: storing the media in selected ones of a plurality of media-on-demand servers, each MODS in said plurality of media-on-demand servers storing the media in at least one format compatible with a selected device type; selecting a MODS for delivering the media to said first client device, said selected MODS having stored thereon the media in a format compatible with said first client device; and delivering from said selected MODS the media in a format compatible with said first client device; and delivering server 23 with a juke box 41 serves as a stored media for clients in selecting programs and each server stores media with compatible formats to the client device with different ports to different networks (Fig. 2, and col. 4/lines 18-53).

Art Unit: 2611

As for claim 7, in view of claim 6 above, Hooper further discloses "wherein said selecting step further comprises: determining if a MODS is available for delivering the media to said first client device in a format compatible with said first client device; if it is determined that a MODS is not available for delivering the media to said first client device in a format compatible with said first client device, selecting a MODS for delivering the media to said first client device, said selected MODS containing the media in a standard format, and converting the media in said standard format to a format compatible with said first client device", i.e., a configuration process is performed for providing appropriate type of broadcasting program if available, if not, an alternative choice such as creating a broadcast stream (col. 7/lines 25-37), as a standard format, to the client device (col. 8/lines 13-53), and then the broadcast stream is being converted at the interface converter as in claim 5 above.

As for claims 8 and 9, in view of claim 3 above, Hooper further discloses "further comprising: storing the media in selected ones of a plurality of media-on-demand servers, each MODS in said plurality of media-on-demand servers storing the media in at least one format compatible with a selected device type; selecting a MODS for delivering the media to said second client device, said selected MODS having stored thereon the media in a format compatible with said second client device; and delivering from said selected MODS the media in a format compatible with said second client device" and "wherein said selecting step further comprises: determining if a MODS is available for delivering the media to said second client device in a format compatible with said second client device; if it is determined that a MODS is not available for delivering the media to said second client device in a format compatible with said second client device in a format compatible with said second client device in a format compatible with

Art Unit: 2611

device, said selected MODS containing the media in a standard format, and converting the media in said standard format to a format compatible with said second client device", i.e., a configuration process is performed for providing appropriate type of broadcasting program if available, if not, an alternative choice such as creating a broadcast stream (col. 7/lines 25-37), as a standard format, to the client device (col. 8/lines 13-53), and then the broadcast stream is being converted at the interface converter as in claims 4-5 above, whether a second device is a HDTV television or a PC.

Page 6

Regarding claim 17, Hooper discloses "a method for providing configurable access to media in a media-on-demand system comprising: delivering the media to a first client device in a format compatible with said first client device; interrupting said delivery of said media; recording a bookmark specifying a position in the media when said interruption occurred; and resuming delivery of the media to a second client device, said resumed delivery beginning at a position in the media specified by said recorded bookmark", i.e., as illustrated in Figure 1, via a communication network 30, users at different locations CPE 10 can access to video-on-demand server system 20 at their convenience locations by using a remote controller or a telephone 13 (a closer look at Figure 12, and col. 1/lines 21-29), wherein the viewing device 12 can be a monitor. a television or a computer work station (col. 3/lines 31-58), and the viewer can pause a requested program or service, and then resuming at any location by accessing to the system with their ID for identifying (Fig. 4, step 420 and col. 8/lines 4-12) and the system has a cache index regarding as a bookmark with cache memory for recording the viewer's location of previously viewed programs, and resuming to the point where the user hasn't finished viewing the program, see col. 15/line 48 to col. 16/line 6).

Art Unit: 2611

As for claim 18, in further view of claim 17, Hooper further discloses "comprising the steps of: identifying a device type for each of said first and second client devices; delivering the media to said first client device in a format compatible with said identified device type for said first client device; and, delivering the media to said second client device in a format compatible with said identified device type for said second client device", i.e., a configuration process including customer's information and the configuration of their device is performed for identifying a particular viewer and their associated device at their location CPE 10 on how to communicate to them (Fig. 4/step 420, and col. 8/lines 4-22), and the media is delivered via a first communications link to a first client device and via a second communications link to a second client device via an intermediate server as an interface box converter 11, this server converts the receiving media to a compatible format to the client device respectively, for instance, HDTV to a television or to a monitor to a personal computer PC (Fig. 12, and col. 14/lines 4-54).

As for claim 21, Hooper discloses "a method for providing configurable access to media in a media-on-demand system comprising the steps of: delivering the media to a first client device session through a first communications link; recording a bookmark specifying a position in the media; and delivering the media to a second client device session through a second communications link, said delivery to said second client device session beginning at said position specified by said recorded bookmark", i.e., as illustrated in Figure 1, via a communication network 30, users at different locations CPE 10 can access to video-on-demand server system 20 at their convenience locations by using a remote controller or a telephone 13 (a closer look at Figure 12, and col. 1/lines 21-29), wherein the viewing device 12 can be a monitor, a television

Art Unit: 2611

or a computer work station (col. 3/lines 31-58), and the viewer can pause a requested session program or service, and then resuming at any location by accessing to the system with their ID for identifying (Fig. 4, step 420 and col. 8/lines 4-12) and the system has a cache index regarding as a bookmark with cache memory for recording the viewer's location of previously viewed programs, and resuming to the point where the user hasn't finished viewing the program, see col. 15/line 48 to col. 16/line 6).

As for claim 22, in further view of claim 21, Hooper discloses "wherein said first and second client device sessions reside in a single client device", i.e., the CPE 10 is considered as a single client device since a HDTV or a monitor of a PC can be within a CPE 10, or to another CPE device as mentioned earlier (col. 15/line 48 to col. 16/line 16).

As for claims 23-27, these claims with same limitations addressed earlier are rejected for the reasons given in the scope of claims 3-9 as disclosed in details above.

#### Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Vaitzblit et al. (US Patent 5,528,513) & Dan et al. (US Patent 5,453,779) disclose systems for scheduling and admission control policy for continuous media server.

Henley et al (US Patent 5,761,417) & Belknap et al. (US Patent 5,586,264) disclose video streamer with cache management.

Sampat et al. (US Patent 5,557,724) disclose user interface, method, and apparatus selecting and playing channels with pause/resuming functions.

Art Unit: 2611

5. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9306, (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park 99. 2121 Crystal Drive. . Arlington. V.A. . Sixth Floor (Receptionist).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krista Kieu-Oanh Bui whose telephone number is (703) 305-0095. The examiner can normally be reached on Monday-Friday from 9:00 AM to 6:30 PM, with alternate Fridays off.

Page 9

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Faile, can be reached on (703) 305-4380.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
